

Guest lecture

The Functional Analysis working group is pleased to invite you to the following lecture:

Uri Grupel

Ben Gurion University of the Negev, Beer Sheva, Israel

Math Safari: Navigating Real-World Applications

Join me as I share insights from my recent work in economics, public policy, and biology. I'll discuss the practical applications of mathematical thinking in tackling various questions across these fields.

Despite the modest complexity of the mathematical concepts involved, I'll illustrate how a different perspective has proven valuable in addressing challenges and applying appropriate mathematical tools.

We will (hopefully) see how an interdisciplinary approach can enrich the understanding of various fields.

Time: **Tuesday, May 28th, 2024, 17:15**

Place: **Technikerstr. 13b, HSB 1**

Guests are cordially invited!
The talk will be master student friendly.

Eva Kopecká
