■ Foreword by the Rector

Univ.-Prof. Dr. Dr. h.c.
mult. Tilmann Märk

Rector of the University
of Innsbruck

This brochure provides an insight into the quantitative development of the University of Innsbruck over the past years. The figures show the enormous efforts of our Alma Mater to position itself in the national and international university landscape as an important research and teaching institution. The positive development of the University of Innsbruck over the last 15 years can be seen in almost all key indicators.

These words are written under the direct impression of the Corona crisis. This crisis will not leave the university system unaffected. However, also in the period after the crisis, universities with strong research and teaching activities are needed to provide answers to the big questions of the present and the future. Since we at the University of Innsbruck have managed the university in a solid and forward-looking manner over the past few years, I firmly believe we are well equipped to meet the challenges of the future. As Rector of the University of Innsbruck, I am very optimistic that - given the commitment of all members of our Alma Mater, which has been impressively demonstrated especially during the crisis - we will be able to master the crisis and shape our future in a forward-looking and positive manner.

Students (total)	27,095
International students	11,914 (44%)
Degrees awarded	4,065
Programs	130
Lectures	Approx. 4,000/semester
Staff (total)	5,101 (persons)
Academic	3,580 (persons)
Non-academic	1,539 (persons)
Publications	4,442
Publications in Web of Science	1,584
Co-authored with international scholars	1,159 (73,2%)
Budget (total)	308,4 million Euro
Third party funding (incl. changes in the total of not yet billable services) and other revenue	61,3 million Euro

As of: May 2020

■ Students

■ Universität Innsbruck

The University of Innsbruck was **founded in 1669** and is the largest and most important research and teaching institution in Western Austria. Today it has 27,100 students and 5,100 staff and faculty. **16 faculties** and **six Research Areas** provide a broad and comprehensive range of research and teaching in all academic fields.

Center for Molecular Biosciences

This integrative and multidisciplinary research and teaching center focuses on the investigation of the structure, function and interaction of biological macromolecules and small molecules that are relevant for cell growth, metabolic activity and development.

Cultural Encounters – Cultural Conflicts

The fate of humanity has always been determined by cultural encounters and conflicts. It has become indispensable for the modern world to understand their causes and effects. Studying these topics in an interdisciplinary approach has been a long-standing tradition at the University of Innsbruck.

Digital Science Center

Digital processes, methods, and media are transforming all aspects of our society, including science. In the Digital Science Center, researchers are investigating all aspects of the digital transformation by linking specialists from different disciplines and fostering interdisciplinary research processes.

Mountain Regions

Academics at seven faculties study human influences and their impacts on the Alpine ecosystem and the role of the Alpine space in cultural exchanges between north and south. Research is aimed at developing strategies for the sustainable utilisation and development of the Alpine Space.

Physics

Physics is not only the scientific foundation for our understanding of nature but also the basis for technological innovation. Scientists of the University of Innsbruck have built many international networks in astrophysics, astroparticle physics, ion and applied physics as well as quantum physics.

Scientific Computing

Today complex scientific questions can be observed and simulated in detail by using highly sophisticated mathematical methods, innovative computer models and new supercomputers. All research activities in the IT sector and e-sciences are concentrated in this research area.

Additionally, there are four **Research Platforms**, **47 Research Centers**, and **17 interdisciplinary Doctoral programmes** with various faculties collaborating. They promote research networks and improve the international visibility of research.
