Dock/Sorrel	●	Fungal spores	●	Dock/Sorrel	●	Fungal spores	●
Risk classes	● absent/very low	● low	● moderate	● high			

### IN A NUTSHELL

We wish you a symptom-free autumn and winter season and look forward to being able to provide information about the pollen situation in Öbergurgl again next year.

As most of the plants have already finished their flowering period, we hardly detect any pollen in the air of Öbergurgl. These low pollen concentrations in the air are no longer reaching the irritation threshold.

This pollen report is the last one for this year. We will report again in 2025 as soon as the

first plants bloom and the pollen concentration in Öbergurgl increases again.

We would like to thank our readers for their interest. We would also like to thank the Ötztal Tourist Office for sponsoring us to publish the weekly pollen report for Öbergurgl.

### Grass pollen concentration (pollen/m<sup>3</sup> of air)
