

Hana Filip (University of Düsseldorf)

Hana Filip is Professor of Semantics at Heinrich Heine Universität in Düsseldorf, Germany. Her research is motivated by her long-standing interest in conceptual foundations of semantics, drawing on both the logical/formal and cognitive research traditions. The main focus of her publications is on aspect, genericity, mass/count distinction, mereological semantics, interaction of noun phrase semantics with verbal aspect, (in)definiteness, context-dependence in semantic interpretation, integration of formal and lexical semantics. The data on which she often draws come from English, German, Czech, Russian, Polish, French and Italian. She received her Ph.D. in Linguistics from the University of California at Berkeley. Her thesis, entitled *Aspect, Eventuality Types and Noun Phrase Semantics*, was published by Routledge Taylor & Francis Group (1999, reprinted in 2022 and 2016). Before coming to Düsseldorf she taught at Stanford University, Northwestern University, at the University of Rochester in the Department of Linguistics and Department of Brain and Cognitive Sciences, University of Illinois at Urbana-Champaign, and University of Florida. She also held appointments as a computational linguist at SRI International in Menlo Park and in the International Computer Science Institute (ICSI) at Berkeley working in the Artificial Intelligence Group.
