PHRASEOLOGICAL APPROACHES TO LEXICOGRAPHY

ROUND TABLE 2

Aspects of the lexicographic process

Moderation: Anja Lobenstein-Reichmann

Experts: Elisabetta Ježek, Peter Uhrig

GUIDING QUESTIONS:

- 1: Some of the PhraseBase-related talks deal with aspects and stages of the lexicographic process: to what extent could be, in your opinion, the involvement of experts (e.g. through crowd-sourcing) and/or of dictionary users a feasible long-term strategy for data acquisition and data validation?
- 2: What kind of opportunities do new Linguistic Information Systems as Phasebase offer? Where are the limitations?
- 3: The lexicographical process also consists of describing semantics, ontologies, differentiating polysemy etc. What do you think are the chances of Phrasebase? Where should the focus be placed?
- 4: After attending this conference what would you like to pass on to the project PhraseBase?
